# PHYSICS LETTERS A

A journal devoted to the rapid publication of short communications in all fields of Physics excluding Nuclear Physics and Particle Physics.

## INSTRUCTIONS TO AUTHORS

*Submission*: Contributions, written in English, should be sent to the editor whose expertise covers the research reported and with whom the author can communicate efficiently.

*Editorial Board, addresses and primary interests*:

V.M. AGRANOVICH
Institute of Spectroscopy,
USSR Academy of Sciences,
Troitsk, Moscow obl. 142092, USSR
Condensed Matter Physics
Theoretical Physics
Statistical Properties of Condensed Matter

A.R. BISHOP
MS-B284, Center for Nonlinear Studies,
Los Alamos National Laboratory,
Los Alamos, NM 87545, USA
Nonlinear Science
Statistical Physics

D. BLOCH
CNRS, Laboratoire Louis Néel,
Boîte Postale 166X, F-38042 Grenoble Cedex, France
Condensed Matter Physics

J.I. BUDNICK
Department of Physics, U-46,
2152 Hillside Road,
University of Connecticut,
Storrs, CT 06268, USA
Condensed Matter Physics (experimental)

R.C. DAVIDSON
Plasma Fusion Center, NW16-202,
Massachusetts Institute of Technology,
167 Albany Street, Cambridge, MA 02139, USA
Plasma and Fluid Physics
Statistical Properties of Plasmas and Fluids

A.P. FORDY
Centre for Nonlinear Studies
and Department of Applied Mathematical Studies,
University of Leeds,
Leeds LS2 9JT, England
Nonlinear Science
Mathematical Physics
Cross-Disciplinary Physics

B. FRICKE
Fachbereich Physik, Universität Kassel,
Heinrich-Plett-Strasse 40, 3500 Kassel, Fed. Rep. Germany
Atomic and Molecular Physics

D.D. HOLM
MS-B284, Center for Nonlinear Studies,
Los Alamos National Laboratory,
Los Alamos, NM 87545, USA
Nonlinear Science
Mathematical and Computational Methods
in Theoretical Physics

A.A. MARADUDIN
Department of Physics,
University of California,
Irvine, CA 92717, USA
Condensed Matter Physics (theoretical)
Statistical Properties of Condensed Matter

J.P. VIGIER
Laboratoire de Physique Théorique, Institut Henri Poincaré,
Université Pierre et Marie Curie,
11 Rue Pierre et Marie Curie, F-75231 Paris Cedex 05, France
General Physics
Gravitation
Physical Principles of Astronomy

In case of doubt, contributions can be submitted directly to the publisher addressed to Physics Letters A, Elsevier Science Publishers B.V. (North-Holland Physics Publishing Division), P.O. Box 103, 1000 AC Amsterdam, The Netherlands. However, it should be realized that such papers will have to be forwarded to one of the editors, which will result in some delay.

No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without the prior permission of the publisher, Elsevier Science Publishers B.V. (North-Holland Physics Publishing Division), P.O. Box 103, 1000 AC Amsterdam, The Netherlands.

*Special regulations for authors.* Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

Submission to this journal of a paper entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S.351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.

*Special regulations for readers in the USA.* This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the US Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of US $ 2.25, also payable through the Center. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Although all advertising material is expected to conform to ethical standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.

# NORTH-HOLLAND DELTA SERIES

**A Series of Selected Proceedings in Physics**

## Scattering in Volumes and Surfaces

*edited by* **M. Nieto-Vesperinas,** *Instituto de Optica, CSIC, Serrano, Madrid, Spain*
*and* **J.C. Dainty,** *Applied Optics Section, Imperial College, London, UK*

**1990 about 334 pages Price: US $85.25/Dfl. 175.00 ISBN 0-444-88529-3**

Inspired by a workshop on Volume and Surface Scattering, held in Madrid, Spain in September 1988, this volume contains contributions from leading experts in the field attending the meeting. It aims to present an exact picture of the subject as perceived by those actively involved in this area and to stimulate interest by giving an account of the considerable progress made in this field over the past few years.

Dealing with the subject of scattering and propagation from random media and rough surfaces, as well as diffraction problems, this book also introduces new multiple scattering techniques, new experimental data, photon localization and enhanced backscattering.

*Contents:* **Part I: Volume Scattering. Part II: Surface Scattering. Part III: Non-linear Interactions.** Author Index. Subject Index.

## SPECIAL DISCOUNT OFFER

Subscribers to this journal are entitled to a **30%** pre-publication discount. Please fill in your subscription number (ask your librarian) on the form below.
Non-subscribers (individuals only!) are entitled to a **20%** pre-publication discount. 404/B/377

**ORDER FORM** (valid until **Jan. 15, 1990**)

*Discounts are valid only if payment is made before the closing date and if orders are sent directly to the publisher.*

**Scattering in Volumes and Surfaces,** edited by **M. Nieto-Vesperinas** and **J.C. Dainty**

**North-Holland,** Attn.: H. de Brouwer, P.O. Box 103, 1000 AC Amsterdam, The Netherlands

US $ prices are valid only in the USA and Canada; in all other countries the Dutch Guilder price is definitive. In New York State, applicable sales tax should be added. No postage will be added to prepaid orders. Customers in The Netherlands, please add 6% BTW. All prices are subject to change without prior notice.

## INSTRUCTIONS TO AUTHORS *(continued from page 2 of cover)*

The manuscripts should be submitted in triplicate, one copy of which is the typewritten original.

All contributions will be refereed. The editors reserve the right to edit contributions, whenever necessary, and to refuse papers which in their opinion do not satisfy conditions as to standard or contents. Linguistic corrections not affecting the meaning will be carried out by the publisher.

By submitting a paper for publication in Physics Letters the authors imply that the paper has not been published previously nor has been submitted for publication elsewhere.

*Manuscripts* should be typed on one side of the paper, with double spacing and a wide margin. The title page should contain title, author(s), address(es) and abstract. The main text should start on a new page.

The *length* of the papers is not formally limited, but expedient and compact formulation, appropriate to a letters journal, is expected. The editor may require the removal of figures, lengthy introductions, derivations, descriptions of apparatus or speculations if these are not essential for the efficient and clear communication of important new results. An *abstract* of less than 50 words is required.

The drawings for the *figures* must be submitted on separate sheets, drawn in black India ink and carefully lettered (with the use of stencil), in such a way that they can be reduced to a one-column width. Sharp and contrast glossy prints are also acceptable. If requested, original drawings will be returned to the author(s) upon publication of the paper.

*Corrections and modifications.* Once the paper has been accepted for publication, minor corrections should be sent directly to the publisher (see below). Extensive modifications should be sent to the editor, while the publisher should be notified to hold publication. Authors may be charged with the costs of necessary retypesetting.

After acceptance of the paper for publication, all further correspondence (except extensive modifications, see above) should be sent to the publisher (Drs. H.A. Arends, Editorial Department, North-Holland Physics Publishing, P.O. Box 103, 1000 AC Amsterdam, The Netherlands; telephone number (020) 5862638), and not to the editors.

More elaborate instructions to authors can be found at the end of each volume.

*Page charge and reprints:* There is no page charge. Twenty-five reprints of each article will be supplied free of charge. Additional reprints may be ordered from the publisher; an order form is sent to contributors upon acceptance of their communications.

## SUBSCRIPTIONS

PHYSICS LETTERS A and PHYSICS LETTERS B will each be published weekly. For 1990 9 volumes, volumes 141–149 (81 issues altogether) of Physics Letters A have been announced. The subscription price for these volumes is Dfl. 2340.00 (US$ 1073.50). Postage and handling amount to Dfl. 252.00 (US$ 115.50). Therefore the total price is Dfl. 2592.00 (US$ 1189.00). For 1990 19 volumes, volumes 234–252 (76 issues altogether) of Physics Letters B have been announced. The subscription price for these volumes is Dfl. 4940.00 (US$ 2266.00). Postage and handling amount to Dfl. 532.00 (US$ 244.00). Therefore the total price is Dfl. 5472.00 (US$ 2510.00).

PHYSICS REPORTS will be published approximately weekly. For 1990 14 volumes, volumes 187–200 (84 issues altogether) of Physics Reports have been announced. The subscription price for these volumes is Dfl. 3640.00 (US$ 1669.75). Postage and handling amount to Dfl. 392.00 (US$ 179.75). Therefore the total price is Dfl. 4032.00 (US$ 1849.50).

The price for a combined subscription to the 1990 volumes of Physics Letters A, Physics Letters B and Physics Reports is Dfl. 10416.00 (US$ 4778.00), including postage and handling.

Dutch guilder prices are definitive; dollar prices are for guidance only.

Subscriptions may be sent to your subscription-agent, bookseller or to the publisher: ELSEVIER SCIENCE PUBLISHERS B.V., Journals Department, P.O. Box 211, 1000 AE AMSTERDAM, THE NETHERLANDS.

*Claims for missing issues* should be made within two months following the date of publication. The publisher expects to supply missing issues free only when losses have been sustained in transit and when stock will permit.

*Special regulations for authors.* Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

Submission to this journal of a paper entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S.351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.

*Special regulations for readers in the USA.* This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the US Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of US$ 2.25, also payable through the Center. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Although all advertising material is expected to conform to ethical standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.

## NOW AVAILABLE!

**Part II of this highly-acclaimed reference book and widely-adopted text by Yvonne Choquet-Bruhat and Cécile DeWitt-Morette:**

# Analysis, Manifolds and Physics

## Part II: 92 Applications

This second, companion volume contains 92 applications developing concepts and theorems presented or mentioned in the first volume. Introductions to and applications in several areas not previously covered are also included such as graded algebras with applications to Clifford algebras and (S)pin groups, Weyl Spinors, Majorana pinors, homotopy, supersmooth mappings and Berezin integration, Noether's theorems, homogeneous spaces with applications to Stiefel and Grassmann manifolds, cohomology with applications to (S)pin structures, Bäcklund transformations, Poisson manifolds, conformal transformations, Kaluza-Klein theories, Calabi-Yau spaces, universal bundles, bundle reduction and symmetry breaking, Euler-Poincaré characteristics, Chern-Simons classes, anomalies, Sobolev embedding, Sobolev inequalities, Wightman distributions and Schwinger functions.

The material included covers an unusually broad area and the choice of problems is guided by recent applications of differential geometry to fundamental problems of physics as well as by the authors' personal interests. Many mathematical tools of interest to physicists are presented in a self-contained manner, or are complementary to material already presented in part I.

All the applications are presented in the form of problems with solutions in order to stress the questions the authors wished to answer and the fundamental ideas underlying applications. The answers to the solutions are explicitly worked out, with the rigor necessary for a correct usage of the concepts and theorems used in the book. This approach also makes part I accessible to a much larger audience.

*CONTENTS:* I. Review of fundamental notions of analysis. II. Differential calculus on Banach spaces. III. Differentiable manifolds. IV. Integration on manifolds. V. Riemannian manifolds. Kählerian manifolds. V bis. Connections on a principal fibre bundle. VI. Distributions. Subject Index.
